

THE LAW OF ATTRACTION IS A CREATIVE PROCESS

Here is how to attract what you wish for:

1. ASK

Make your wish to the Universe through an oral or written prayer of GRATITUDE on the present tense and with a positive twist: "I'm so happy and grateful for...."

Explain how you want your life to be at every level, for example: "I'm so happy and grateful that my body is in good health! Thank you Universe for my promotion and the quick pay back of my student loan!"

2. BELIEVE YOU ALREADY GOT IT

Believe that you have already received what you have wished for: The Universe will reorganize itself so it can come true in reality. Patience, this takes some time! You don't need to overthink the process that is happening to make it come true in your life: just the magic happen and let go.

3. FEEL THE JOY

Rejoice yourself! Feel the gratitude and joy: live the emotions you will feel when your wish will come true! It's important to associate a happy emotion with your wishes during the creative process to emit good frequencies.

Try to maintain a high level of joy by picturing the things that make you happy because the inner happiness is the driver of success !
